

Almost ELOs

You may be close to doing ELOs at your school without realizing it. With minor changes, common academic structures and activities can expand into ELOs.

The following chart lists activities in Section 306.27 (b) of the NH Minimum Standards for School Approval that could be ELOs, plus some others, and what you might add to make them into high quality ELOs. For example, a senior project ELO might just need an essential question and a final presentation. An internship might need an essential question, research, reflection and a product. It all depends on how your school currently sets up these activities.

Elements of high quality ELOs  These meet the state's definition of ELOs, but may not contain all the elements of a high quality ELO. 	Community-based	Community partner/mentor	Credit-bearing competencies	Essential Question	Research	Reflection	Product	Presentation of Learning
