## Posters and Pins!

The NH Needs Caregivers Healthcare Heroes in the Making Program is excited to share the posters for ELO Coordinators and schools! The posters are 'print on demand' in a variety of styles and sizes. They are available as an attachment to the monthly email to ELO Coordinators and/ or by contacting Lynn Carpenter, Program Director. We are also happy to share the logo (above) for the pins, which will be given to each participant upon completion of the LNA course. We are excited to present these to our first group of participants on the Seacoast later this month!

## Frequently Asked Questions (FAQs): Updates and General Information

**I have students interested in participating over the summer. How will that work if school is not in session?**

We encourage ELO Coordinators and/ or academic advisors to submit applications as soon as possible. LNA courses will run over the summer, and the Program Director will be available for support, however, ELO Coordinators will not be in the schools or available to accept applications from their students. Students who wish to apply after the end of the school year will need to wait until school starts in the Fall.

**One of my students was accepted to participate in the Healthcare Heroes in the Making Program but is no longer interested. What should I do?**

Please notify Lynn Carpenter, Program Director.

**How much does this program cost the student?**

The Healthcare Heroes in the Making covers the tuition, uniform, and licensing costs of the LNA course. The student is responsible for travel costs to and from class (as applicable) and any costs associated with missed class(es).

**Will the Healthcare Heroes in the Making Program be available next year?**

At this time, the program is funded through 12/31/2022.

### A Special Thank You

A very special thank you to **Brenda Rees** with LNA Health Careers for her efforts to coordinate program registrations, LNA courses, and provide general information and support. Brenda has been a tremendous advocate and supporter of the Healthcare Heroes in the Making Program and we appreciate her efforts to make the program successful. Thank you, Brenda!
