

## Poetry unit summative

You have analyzed and created your own poems for a couple weeks now. With that knowledge in hand, you will complete a short poetry compilation in which you will complement each poem with photos you have taken (you can use photos from this semester, and/or older ones.) You should include at least 8 poems, and at least 4 of those will be new writes that you create for this compilation.

This is a bit of a test run for your final project, except this will have only one genre of writing represented. Once the compilation is complete, you will complete the reflection below and hand that in along with the compilation. This can be printed on paper or completely done online. If you do it in a word document, you can include the reflection at the end of your poetry compilation, rather than in a separate document.

### Project MUST include:

- At least 8 poems, 4 of which must be new writes
- Each poem must be accompanied by one or more photos. Photos can be inspired by the writing, OR the writing can be inspired by the photos.
- You must include at least 3 different types of poetry, and follow correct conventions for the types you have chosen.

### Reflection:

Write a reflection and be sure to discuss the following guiding questions: Why did you choose to include the poems you chose from this unit? What poems were the most challenging to write, and why? How did you choose what picture went with each poem? Why did you choose the genres of poetry that you chose?
